| <https://hamidreza7756.github.io/cyber-portfolio/>

Motivated cybersecurity professional completing the Google Cybersecurity Professional Certificate with hands-on experience in Linux, SQL, security fundamentals, SIEM tools, Wireshark, and threat detection. Skilled in analyzing logs, identifying vulnerabilities, and applying security best practices through real-world labs in TryHackMe. Strong problem-solving ability, disciplined work ethic, and customer-focused communication developed through technical and client-facing roles. Seeking an entry-level cybersecurity role where I can contribute to SOC operations, incident detection, threat analysis, and security monitoring in a collaborative team environment.

## RELEVANT SKILLS & EXPERTISE

**Tools / Languages:** Linux, Windows, SQL (BigQuery), Wireshark, Splunk, Suricata, Tcpdump, Python (Beginner), ChatGPT (security workflows)

**Security Practices:** Threat Analysis, Log Analysis, Vulnerability Assessment, Risk Identification, Incident Handling, Security Controls, Security Monitoring

**Software Platforms:** Google Workspace, Slack, Virtual Machines, TryHackMe Labs

**Strengths:** Problem-Solving, Attention to Detail, Discipline, Collaboration, Customer Service, Communication

## CYBERSECURITY PROJECTS

### TryHackMe Rooms | Virtual

- **Linux Fundamentals 1, 2, & 3:** Strengthened command-line skills by navigating directories and files, adjusting permissions, analyzing logs, and using common utilities used in system administration and security workflows.
- **Intro to Logs and Log Analysis:** Identified suspicious patterns in system logs by applying regular expressions, filtering techniques, and command-line tools to support basic threat detection and investigation.
- **Wireshark Basics and HTTP in Detail:** Analyzed packet captures and network traffic involving ARP, ICMP, TCP, DNS, HTTP, and HTTPS to better understand protocol behavior and support troubleshooting and security analysis.
- **Windows Fundamentals 1, 2, & 3:** Built foundational knowledge of Windows security concepts, including file systems, user account control, registry, and administrative tools, improving ability to identify system-level risks and vulnerabilities.
- **Splunk Basics / Incident Handling with Splunk / Splunk 2 & 3:** Queried and analyzed log data in Splunk to investigate suspicious events, support incident analysis, and strengthen understanding of SOC workflows and alert review.
- 

## PROFESSIONAL EXPERIENCE

### Sales Associate | AutoNation Infiniti Tustin, Tustin, CA

01/2024 – 07/2025

- Delivered customer support to **10–15 customers daily**, assessing needs and recommending vehicle solutions that contributed to a strong customer experience and repeat business opportunities.
- Built trust with customers by clearly explaining complex vehicle features, safety systems, and warranty options in non-technical language, improving customer confidence and decision-making throughout the sales process.
- Collaborated cross-functionally with finance, service, and management teams to ensure smooth transactions and timely issue resolution, reducing delays and improving overall customer satisfaction.
- Maintained accurate documentation and followed compliance-driven dealership procedures, supporting error-free transactions and organized recordkeeping.

- Managed multiple customer interactions simultaneously in a fast-paced environment while maintaining professionalism, accuracy, and strong communication under pressure.

## HVAC Technician | Subtech HVAC Company, Anaheim, CA

01/2023 – 04/2024

- Diagnosed and resolved refrigeration and HVAC system issues by analyzing performance data, control behavior, and component failures, restoring reliable operations and reducing repeat service needs.
- Installed, configured, and supported KE2 Evaporator Efficiency controllers with built-in remote monitoring and diagnostics, enabling earlier detection of system issues and improved operational efficiency.
- Monitored temperature trends, defrost cycles, and evaporator efficiency through remote tools to identify anomalies before system failure, minimizing downtime and operational disruptions.
- Communicated technical system issues and recommended solutions clearly to non-technical customers, improving customer understanding, trust, and service experience.
- Documented findings and troubleshooting steps using schematics and structured service processes, ensuring accurate records and more consistent follow-up across visits.

## Freelance Photographer | International

02/1998 – 09/2021

- Managed multiple client projects per month, coordinating schedules, deliverables, and client expectations while consistently meeting deadlines.
- Maintained a high level of attention to detail during image capture and post-production editing, strengthening analytical thinking, pattern recognition, and precision.
- Built long-term client relationships through consistent quality and clear communication, resulting in repeat engagements and referrals.
- Balanced creative execution, client service, and deadline-driven work across multiple assignments, strengthening organization, accountability, and independent problem-solving skills.

## Professional Development

09/2021 – 01/2023

- Focused on technical training and career transition preparation, including HVAC studies and certification work, while building hands-on troubleshooting and systems knowledge.
- Strengthened analytical, technical, and problem-solving skills through coursework and independent learning that later supported both HVAC and cybersecurity training.
- Monitored temperature trends, defrost cycles, and evaporator efficiency through remote tools to identify anomalies before system failure, **minimizing downtime and operational disruptions by 17%..**
- Communicated technical system issues and recommended solutions clearly to non-technical customers, improving **customer understanding, trust, and satisfaction.**
- Documented findings and troubleshooting steps using schematics and structured processes, ensuring **accurate records and consistent follow-up across service visits**

- Managed **16-18 client projects per month**, coordinating schedules, deliverables, and client expectations while meeting strict deadlines.
- Maintained a high level of attention to detail during image capture and post-production, further developing strong **pattern recognition and precision**.
- Built long-term client relationships through consistent quality and clear communication, resulting in **repeat engagements and referrals**.

---

#### EDUCATION, CERTIFICATES, & CERTIFICATIONS

---

##### Google Cybersecurity Professional Certificate • *Merit America, Virtual*

**03/2026**

- Cultivated holistic understanding of cybersecurity's critical role in organizational security, privacy, and success, including how to systematically identify and mitigate risks, threats, and vulnerabilities
- Gained practical experience with **Linux, SQL, Python** and utilized **SIEM tools, IDS, and network protocol analyzers** for proactive threat management
- Applied knowledge to real-world scenarios, developing skills in proactive **threat detection** and **response** through completion of dynamic hands-on projects, including: conducting a simulated **security audit**, responding to a **cyber incident**, analyzing **vulnerable systems**, and completing an **incident handler's journal**

##### HVAC/R Technology • *Brownson Technical School, Anaheim, CA*

**2022-2023**

- **Certifications include:** EPA Universal 608 & 410a, OSHA 10, NATE Core, BACnet Facilities Managers Guide, YASKAWA HV600 Startup Specialist, HVAC Excellence Electrical, and HVAC Excellence Air Conditioning
